### DSLR Cleaning System from VisibleDust

VisibleDust has released its Arctic Butterfly SD 800 Professional Kit, a digital SLR dry-cleaning system. The kit includes three sensor brushes (one APS-size, one 1.6x-size, and one 1.0x-1.3x size), and an angled mirror brush designed to clean the focusing screen and primary mirror. The brushes, which utilize "super-charged fiber technology" to lift dust off the sensor, attach to the Arctic Butterfly 724, a battery-powered spinning device also included in the kit. A brush adapter for the Arctic Butterfly comes with the cleaning system. Approximate price: \$162.
